

Roboimpacts®

Used in numerous industries - Utility, Telecom, Mining, Military and others - Aircraft Dynamics' impacts are known for their exceptional engineering and durability. Using a heavy-duty proprietary motor, Roboimpacts are so versatile they can be powered at either 24 or 36 volts. When used at 36 volts, these tools will provide up to 2500 impacts per minute and up to 350 ft./lbs. of torque, making them the most powerful tools of their kind in the world.

- ✓ Extremely powerful and fast!
- ✓ Attached 8 ft. cords plug into Robopaks for versatile power tool needs.
- ✓ Powerful 30AMP reversible motors provide up to **350+** ft./lbs. of torque and **2500** impacts per/min.
- ✓ Reversing switches located on high strength, impact resistant handles.
- ✓ Secondary 2-position attachable handles provide added control.
- ✓ 1/2" square drive units can be easily converted to either 7/16" or 5/8" hex quick-change chucks.

Whether overhead, on the ground, or even underground, Roboimpacts are so fast and powerful in drilling and hardware applications that they will return many times their costs in man hours saved. Roboimpacts provide a portable, safe, clean and powerful alternative - no GFCI requirements or leaking hydraulic or gas lines - allowing them to be taken to the most remote locations and used in the most demanding situations.

Roboimpacts®

D-HANDLE ROBOIMPACT WRENCH/DRILL

Available in three choices:

Cat. No. 2001:

7/16" Hex Quick-Change

Cat. No. 2002:

1/2" Square Drive

Cat. No. 2004:

5/8" Hex Quick-Change
