

Pole Transportation

Robolights

“Pole Bug”

Using effective, long lasting LED technology - LEDs are rated for 100,000 hours of heavy duty operation - these systems provide the ultimate in pole transportation safety. Each LED Strobe (available in Amber or Red) has a 5-7 mile visibility range and includes four flash patterns: Comet, Single, Steady Burn and Flare Flicker. Light modules are encapsulated for vibration and moisture resistance with front/angled reflectors. Each Strobe is powered by three alkaline “C” batteries, providing 100+ hours of continuous operation. Easy to attach and deploy, using a heavy duty strap that attaches to all poles. Additional features include powder coated metal components and dual flag holder. Includes batteries and two flags.

LED Strobe with Dual Flag Holder
 Cat. No. 7015-R (Red)
 Cat. No. 7015-A (Amber)

- Available in Red or Amber LED Light
- Four Flash Patterns
- LED Rating: 100,000 hours
- Batteries Three Alkaline “C”s
- Battery Run Time: 100+ Hours

Lights can be viewed from back and (side)

LED

Systems are compact and designed to be stored on your vehicle.

Dual LED Strobes with Dual Flag Holder

Cat. No. 7026-R (Red)
Cat. No. 7026-A (Amber)

Pole Mount Dual Flag Holder

Cat. No. 2642

Dual Flag Holder is extremely rugged and is easy to attach and deploy, using heavy duty strap that attaches to all pole sizes. Holder is made out of heavy-duty powder coated metal components.
