*“I’ve been a lineman/servicer for a large utility company for 31 years. One big problem I have is changing taps on a 34 KV Pad Mount Transformer using a Hot Stick. The transformer Tap Twister makes changing taps as easy as turning on a light switch. Any linesperson or servicer who has to switch a 34.5 KV Pad Mount by him or herself will see it right away.”*

*-Dave Seel, General Servicer*
